

At eBlinds Australia we feel it is important for you to know that we do not import finished product. We are very proud that all blinds sold by eBlinds Australia are made to your requirements right here in Australia, by Australian workers.

Each Honeycomb Blind manufactured by eBlinds Australia is done so using only the highest quality componentry. All Honeycomb Blind componentry is backed by our 5 year warranty, please view our warranty section for further details.

All fabrics are cut to size using state of the art automated and semi automated machinery ensuring a perfect edge and square blind everytime.

Each Honeycomb Blind comes standard with the following:

- All fixing brackets
- Screws for timber installation
- Installation instructions
- Child Safe Cord Tidy (where applicable) in compliance with the Child Safety Regulations.

Honeycomb Blinds are a stylish, functional, versatile energy efficient window covering solution.

The unique structure of the honeycomb cells means that the hot air in *summer* and cool air *winter* becomes trapped within the cell effectively slowing down the transfer of the hot / cold air from outside to inside and of course the complete reverse from inside to outside in relation to your heating or cooling.

25mm Single Cell - save up to 32%* on your heating costs

* Savings are based on the installation of fully recessed, reveal mounted blinds in an average home, compared with the house energy rating for standard roller blinds from accuRate in that home. These calculations have been modelled by an independent third party and savings will vary depending on window type and installation.

Blind Projection - from back of bracket to front of blind
