

At eBlinds Australia we feel it is important for you to know that we do not import finished product. We are very proud that all blinds sold by eBlinds Australia are made to your requirements right here in Australia, by Australian workers.

Each Venetian Blind manufactured by eBlinds Australia is done so using only the highest quality componentry. All Venetian Blind componentry is backed by our 5 year warranty, please view our warranty section for further details.

Each Venetian Blind comes standard with the following:

- All fixing brackets
- Screws for timber Installation
- Installation instructions
- Child Safe Cord Tidy (where applicable) in compliance with the Child Safety Regulations.

Aluminium Venetians

At eBlindsAustralia, our Venetian Blinds are constructed using slats that have been engineered and manufactured in Europe from 0.22mm gauge high grade aluminium which maximises the tensile strength of the slat.

This is followed by a rigorous painting procedure which includes washing all slat material in hydrochloric acid to improve impurities from the surface of the raw aluminium. Once the acid has been rinsed, the slat material then goes through a tensile stretch oven and roller. Due to this procedure, the slat emerges with a tensile strength which allows it to be bent at 180 degrees around a 12.5mm radius when crowned.

The final stages see the application of an undercoat that etches into raw aluminium surface and once applied, it is baked in a specialised oven. The final color finish is applied by a roller and again, the material is baked. Once the material has cooled it is then rewound onto coils and is then ready for production.

The above processes give our Aluminium Venetians the flexibility to be highly resistant to kinking or buckling and also prevents the slats from chipping or flaking and of course, offers excellent protection from corrosion.

Visionwood Venetians

Visionwood Venetians are a great alternative to natural wood particularly where the style and functionality of painted timber Venetians is required but durability and budget constraints are also a consideration. The 63mm slat is a great alternative for budget conscious customers wanting to achieve the look of Plantation Shutters.

Visionwood Venetians are a popular choice in high humidity environments, such as kitchens, bathrooms and heavy traffic areas, where a tougher finish is required. Our low maintenance slats are washable and fade resistant, without the issues encountered with natural wood.

Visionwood has been specially designed with the harsh Australian climate in mind and are suitable for both residential and commercial applications. It is aesthetically stylish and can be manufactured in both 50mm and a limited range of 63mm slats in a modern range of colours from classic Whites through to the on-trend Greys and neutrals

Pure Wood

A range of contemporary colours, rustic wood grains and sophisticated high gloss finishes.

Pastel - A modern collection of stylish matte wood varieties in delicate pastel colours for a neutral colour palette. The wooden slats have been painted with a matte chalk finish, and powdery colours to create a minimalistic look to your interior.

Shadow – Matte wood varieties in neutral and darker fashionable tones for a strong, modern and contemporary look.

Glossy – High gloss wood in three classic colours, Black, White and Ivory for a sleek, modern luxurious look. The high gloss, transforms the Pure Wood Venetian into an eye catcher, completing the look of any room.

Urban – A natural timber pattern, available in a selection of modern, contemporary wood tones. A classic look with a modern twist while bringing warmth and ambience to the home

Blind Projection - from back of bracket to front of blind
